

To Carolinas Photonics Consortium Contacts,

WCU would like to invite you attend a brief meeting at WCU's Rapid Center on the afternoon of April 7th. WCU has recently received new, leading edge prototyping capabilities which could have immediate benefit to regional companies. Additionally, WCU would like to highlight a few industrial projects as examples of engagement with industry. The goal of the meeting is to establish new relationships with regional companies as a first step in providing near term and long term benefits to the companies' needs, while enhancing the academic experience of the students at WCU. We hope that you can join us for this brief afternoon meeting to see if these capabilities might have benefit for your company.

What:

Western Carolina University Center for Rapid Product Realization (Rapid Center)
Interaction meeting with regional industry

When / Where:

April 7, 2008
